

# PowerChrome K3 Pigment Inks

## PowerChrome K3 Ink Technical Data

EKI Tech. Data\_121026

### General Information

InkTec's PowerChrome K3 ink has four different blacks. It allows customers in photo printing business to have higher printing quality output of images when printed in black & white. In addition, new vivid magenta and light magenta provide wider color gamut compared with its counterparts on the market. PowerChrome K3 has also fast drying time on various media and is suitable for fast printing mode. You'll experience more realistic and brighter image than previous InkTec PowerChrome ink.

### Wider Color Gamut

- High Density pigments for extremely wide color gamut
- Very similar color gamut to OEM

#### OPTION

Printer	EPSON PX-7550
Resolution	720 X 720 dpi
