3.3.2 Service mode functions

This printer has a Service mode to set service only settings and output test prints. The Service mode can be entered using the control panel.

<Service mode operation list>

1) With the printer power OFF, while pressing the Resume button, press the Power button. (Do not release the power button.)

2) While pressing the Power button, release the Resume button, press the Resume button again twice, and then release the Resume button and Power button.

3) The green indicator flashes during initialization.

When the indicator stops flashing and remains on, press the Resume button the specified number of times to select the function.

(The indicator toggles between orange and green each time the Resume button is pressed.)

4) After selecting the function, press the Power button, and the green indicator will light, and the function will be executed.

<i550/i850 Service Mode>
